

Please dp not strike down New Jersey's Do not Call list. I think it is an intrusion to my privacy when I get unsolicited calls trying to sell me something. The federal law should be made stronger, and should exclude those begging for money as well as sellers. If they can't market with direct mail then it does no good to call me anyway because I will never buy something from anyone who calls me to sell. But before I was on the don't call list the phone never got answered here because 90% of all incoming calls were solictations.

Thank you,  
Russell C. Pillsbury
